

ATTENTION TEACHERS:

Want to get WET?

Join us on Saturday, Oct. 26, 2002!

The Mullica Watershed Planning Project (Watershed Management Area 14) will sponsor a Project WET (Water Education for Teachers) workshop for educators in grades 3 to 9 on **Sat., Oct. 26, 2002** at the Mt. Misery Retreat Center, Browns Mills, NJ. The registration fee is only \$25 (includes morning refreshments, lunch and the Project WET Curriculum Guide).

Project WET focuses on the importance and value of water throughout our lives, as well as introducing the concept of watersheds and how water flows through and affects them. It shows teachers how to integrate these ideas into almost any subject, and provides you with hands-on activities you can use in your lesson plans.

During this six-hour session, you'll participate in several "hands-on, minds-on" activities, both indoors and out. In addition to the Project WET Curriculum Guide, you'll receive NJ-specific water resource information and access to water education materials.

October is Pinelands Month! Much of the Mullica Watershed is located in

the Pinelands National Reserve, home to extensive pine and oak forests, cedar swamps, cranberry and blueberry farms and many unique plants and animals. Teachers attending this workshop will learn about the special environment of the Pinelands and how to incorporate this information into your lessons.

A Few Great Reasons to Attend:

- ✍ Obtain the tools and knowledge to encourage your students to have a better appreciation for the importance of water in their lives and an understanding of how this valuable resource is managed in NJ.
- ✍ Promote the goals of the Mullica Watershed Planning Project: to maintain, restore or enhance water quality, water quantity and ecosystem health.
- ✍ Gain Professional Development Credits!

To register, fill out the form on the back of this sheet and mail with a check.
